

# VIVOA

An immersive, collaborative tool for visualizing your projects from conception to completion

## CHALLENGES

Provide design teams with a practical, powerful, and cost-effective means of improving knowledge of existing projects or sites, and supplementing design data:

- Get a **complete 360° digital view** of the project
- **Share visual data** among stakeholders
- **Reduce the risk of errors** between design and construction
- **Validate work compliance** as construction progresses
- Create a **digital archive** and preserve project **history**

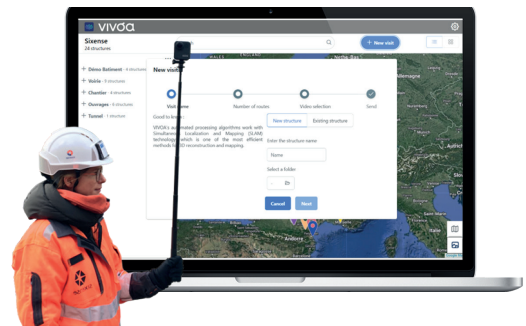

## SOLUTION

With VIVOA, you can **create and share your own immersive visits** in 3 easy steps:

1. **Capture:** record a **360° video** with a consumer camera
2. **Send:** upload your video to our **secure, collaborative platform**
3. **Visit:** view your assets **remotely at any time**

At the end of each immersive visit, you can **annotate** the images directly on the platform, **share** your comments with your partners and **securely** archive all your visits.

## BENEFITS

**Easily digitize and visualize** your projects.

**Improve operational efficiency and collaboration**, from inception to completion, with a collaborative and powerful immersive solution.

- **Autonomy:** create and manage your immersive visits of your projects without special technical assistance
- **Improved team coordination and work monitoring:** a unique and comprehensive means of sharing information with all stakeholders (project managers, contractors, site crews, etc.)
- **Cost optimization:** less travel, greater efficiency and immediate savings

## Sixense's

Multidisciplinary engineering with over 25 years' experience

Innovative digital solutions and customized developments

Experts to support you in your diagnostics, studies and work supervision.
